Leadership AI Roadmap Sprint

Get your district leadership team aligned on AI — fast.

THE CHALLENGE

Your district is already adopting AI — the question is whether it's happening *with a plan* or without one. Most districts are moving fast but fragmented: no shared vision, no guardrails, no leadership alignment.

What Is the Leadership AI Roadmap Sprint?

A structured, facilitated experience designed exclusively for K-12 district leadership teams. In just a few intensive days, your cabinet — superintendents, cabinet members, and key directors — works through a proven process to build real alignment around AI.

WHAT YOU'LL DO	WHAT YOU'LL WALK AWAY WITH
• Assess your district's current AI reality	• A shared AI vision your whole cabinet owns
• Identify gaps in policy, practice & equity	• Clear guardrails and governance framework
• Build a shared leadership vision for AI	• A board-ready AI implementation plan
• Define guardrails and approved use cases	• Aligned leadership — no more siloed adoption
• Map your 90-day implementation path	• Confidence to move forward strategically

Who It's For

- **Superintendents & Assistant Superintendents** ready to lead with clarity
- **Cabinet-level leaders** — CAOs, CTOs, Curriculum Directors — who need alignment
- **Cross-functional district teams** of 4–12 people navigating AI adoption together
- Districts that are **already using AI tools** but doing so without a coordinated strategy

> *"The only structured, facilitated experience built specifically for K-12 district leadership teams who need to get aligned on AI — fast. No generic tech training. No homework. Just clarity."*
